

- Fast Acting
- Non Intrusive
- Very Affordable
- Easy Installation
- Low Maintenance
- System Fault Monitoring

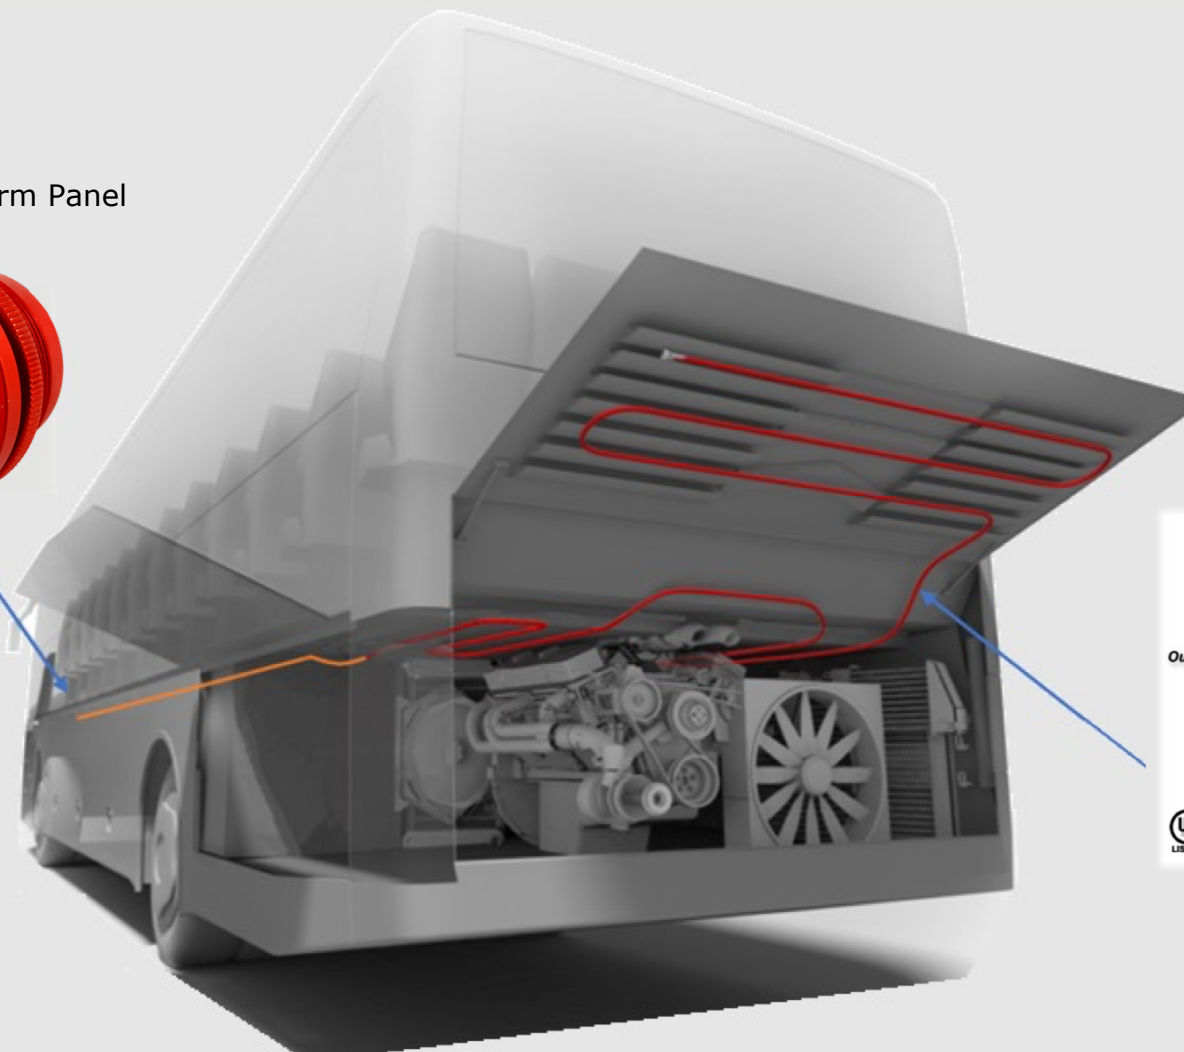

Dash Mounted Alarm Panel
(50mm)

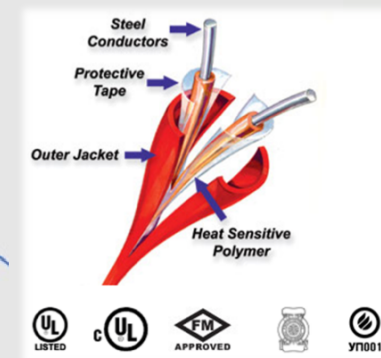

The BlazeCut Bus Fire Warning can be used as a first step safety solution to warn the driver and passengers of a fire. As a warning only system, it uses our compact CAP200 50mm Alarm Panel with BlazeWire Linear Heat Detection To monitor the engine bay and electrical areas for fires Or any faults where the temperature may rise above the acceptable levels.

The CAP200 alarm panel signals an "OK" active light during operation and constantly monitors the the BlazeWire and will alert the driver with an audible and visual a "Fault" alarm in the event of any issues with the system.

In the Event of a "Fire" a visual and 85dB Sounder alarm will be activated.

BlazeWire Detection
(180°C)

- Engine Bay
- Cargo Hold
- Electrical Panels
